

Artificial Water Fluoridation Chemicals 2

<1% of artificial fluoridation chemicals are ingested.

> 99% of artificial fluoridation chemicals go

**down the toilet
washing machines
dishwashers
lawn watering
showers
baths
car washes
gardens
golf courses
agriculture
into the environment**

2.1 Trillion Litres of Fluorosilicate-Contaminated WasteWater Added Per Year to Source Water in Ontario

\$Taxpayers Would Save\$

Toronto would generate from \$420.7 million to \$760.5 million in estimated cost savings over a ten year period with the discontinuation of artificial water fluoridation. <http://gerrycooper.typepad.com/blog/2010/03/a-safe-and-sustainable-toronto.html>

Polluting companies save \$8-10,000/ton

@\$7-8,000/ton for the safe removal of these hazardous wastes (source: Dr. W. Hirzy, senior US EPA chemist)

@\$1,500/ton received from municipalities (Hamilton, Ontario, Canada BOH July 9, 2008).
