

Social Justice = Protecting the Vulnerable

Canadian Charter of Rights and Freedoms

Equality Rights 15 (1) Any law or action which imposes burdens, obligations or disadvantages to minorities is discriminatory.

There is **NO SOCIAL JUSTICE** in the promotion of an **UNREGULATED, UNCONTROLLED** product used in the prevention of oral disease which has never been assessed for safety or efficacy by any government agency.

Minorities “at risk” of fluoride over-exposure

[National Research Council 1977/2006 - US Agency for Toxic Substances & Disease Registry 1993, US Environmental Protection Agency]

- Pregnant and lactating mothers, fetuses, young children
- Hypersensitive to fluoride [~1-5% of population]
- Elderly (over 65) [~12% of population]
- Diabetics [~5-10% of population]
- Cardiovascular Disease [~5% of population]
- Renal Disease [~5% of population]
- Diets with essential vitamin and mineral insufficiencies such as:
 - calcium, magnesium [27-44% of the population]
 - iodine [~38% of world's population]
- Thyroid insufficiency [~5-10% of the population]
- Those who consume up to ten times more water than the average: see National Research Council 2006 Review Tables 2-4 & B-14
