

## Who Regulates Artificial Water Fluoridation Chemicals?2

### **UNFORTUNATELY Health Canada accepts no responsibility**

"Although these products and materials are not currently regulated at the national level, Health Canada recognizes the importance that they be effective and safe."  
<http://www.hc-sc.gc.ca/ewh-semt/water-eau/drink-potab/mater/index-eng.php>

### **Self-Regulating Private Consortium called NSF regulates these**

**chemicals:** NSF Standard 60 established a single product allowable contaminant (SPAC) for individual drinking water additives products at 10% of the Maximum Allowable Concentration level (MAC) to recognize that contaminants may enter drinking water from other points throughout the system.

### **UNFORTUNATELY NSF ignores this Standard 60 requirement for artificial water fluoridation chemicals.**

US 2004 Congressional testimony: Mr. Stan Hazan, General Manager, Drinking Water Additives Certification Program, National Sanitation Foundation (NSF), the self-regulating, private consortium which certifies water fluoridation chemicals, testified, under oath;

" NSF failed to follow its own Standard 60 procedures"

### **UNFORTUNATELY the private consortium NSF does not accept any responsibility for the safety of the chemicals they "certify".**

"NSF, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party." [www.foodsafety.gov/~comm/ift4-ae.html](http://www.foodsafety.gov/~comm/ift4-ae.html)

"The NSF International does not evaluate safety of the chemicals added to water for the purpose of the treatment or mitigation of disease in humans, and does not evaluate the product added to water but only the impurities within the product."  
*SOURCE: letter to Dr. Bill Osmunson, DDS, MPH, 2/1/07*

### **UNFORTUNATELY for taxpayers, NO ONE accepts responsibility for the safety of these fluoridation chemicals**

Clearly the taxpayers cannot rely on a self-regulating private consortium which accepts no responsibility for its products and which does not follow its own standards, to provide "rigorous standards of purity and quality".
