

# Fluoride is ...

## 1. FLUORIDE IS A CONTAMINANT

when found 'naturally' in air or water.

“Fluoride is one of the natural contaminants found in public drinking water supplies” p 13 National Research Council Review 2006  
MAC = Maximum Acceptable Contaminant level of fluoride

## 2. FLUORIDE IS A HAZARDOUS WASTE

when man-made then removed by smoke stack “scrubbers” as required by pollution legislation.

## 3. FLUORIDE IS A PESTICIDE

when used to kill pests.

## 4. FLUORIDE IS A DRUG OR HEALTH PRODUCT

when used in “the diagnosis, treatment, mitigation or prevention of a disease, disorder or abnormal physical state or its symptoms in humans” (Food and Drug Act, National Association of Pharmacy Regulatory Authorities [www.napra.org](http://www.napra.org))
