THE CASE AGAINST FLUORIDE:
how hazardous waste ended up in our drinking water and
the bad science and powerful politics that keep it there.

“After reading this book, one is left with the strong
impression that water fluoridation is an idea that is well past
its ‘sell by date’ and that it should be rapidly phased out.
What is now clear is that, if proposed today, fluoridation of
drinking water to prevent tooth decay would stand virtually
no chance of being adopted, given the current status of
scientific knowledge The good news is that, unlike many
other forms of pollution, fluoride will leave no persistent
legacy if adding fluoride to drinking water is stopped.”

Book available from:

Dr. Paul Connett
PhD (Chemistry), Emeritus Professor of Chemistry at St
Lawrence University, Canton, NY, where his areas of expertise
were environmental chemistry and toxicology. Director of Fluoride Action
Network (FAN).

Dr James S Beck
M.D., PhD, Professor Emeritus of Medical
Biophysics at the University of Calgary
and holds doctorates in medicine from
Washington University School of Medicine
And biophysics from University of California, Berkeley.

Dr H Spedding
Micklem
Professor Emeritus in School of
Biological Sciences at University of Edinburgh.
He holds a DPhil from University of Oxford.

Dr. Vyvyan Howard
MB ChB, PhD, FRCPath, Professor
of Bioimaging, Nano
Systems Biology,
Centre for Molecular
Biosciences, University of Ulster. He is a toxico-
pathologist specialising in the problems associated
with the action of toxic substances on the fetus
and the infant.
